Course Description
This seminar has been designed to encompass state-of-the-art practices and trends in treating pediatrics. A faculty both clinically and academically oriented will address relevant issues and provide valuable information and insight into situations commonly presented to subspecialists and primary care providers.

Target Audience
This course is designed for regional and affiliate pediatricians, hematologists/oncologists, family physicians, nurse practitioners and other health care professionals interested in updating their knowledge about advances in the treatment of children. The conference was designed for physicians; however, nurses are strongly urged to attend.

Course Co-Directors:
Russell Cheuney, M.D.
Le Bonheur Professor and Chair
Department of Pediatrics
University of Tennessee Health Science Center
Vice President, Academic Affairs
Le Bonheur Children's Hospital
Memphis, Tennessee

Judith A. Willimas, M.D.
Member, St. Jude Children's Research Hospital
Medical Director
Referring Physicians Office and Domestic Affiliate Program
Department of Oncology
Professor of Pediatrics
University of Tennessee Health Science Center
Memphis, Tennessee

Etteldorf Speaker:
Paul V. Miller, M.D., FAAP
Senior Vice President for Maintenance of Certification and Quality
American Board of Pediatrics, Chapel Hill, NC

Faculty:

Martin L. Biskup, M.D.
Associate Professor of Surgery and Pediatrics, University of Tennessee Health Science Center; Le Bonheur Children's Medical Center; Memphis, Tennessee

B. Smith English, M.D.
Professor and Chief, Division of Infectious Disease, Department of Pediatrics
University of Tennessee Health Science Center; Le Bonheur Children's Medical Center; Memphis, Tennessee

Barry Gillespie, M.D.
Associate Professor of Pediatrics
Department of Pediatrics
University of Tennessee Health Science Center; Le Bonheur Children's Medical Center; Memphis, Tennessee

William L. Guess, Pharm.D.
Chief, St. Jude's Research Hospital, Chief Pharmacist
College of Pharmacy
University of Tennessee Health Science Center; Memphis, Tennessee

Henry G. Herron, III, M.D.
Former Dean, University of Tennessee Health Science Center; Professor of Pediatrics
University of Tennessee Health Science Center; Memphis, Tennessee

Infectious Disease, Assistant Professor
Department of Molecular Sciences
University of Tennessee Health Science Center; Memphis, Tennessee

Regina Perry MSN, APRN-BC
Nurse Practitioner, Le Bonheur Children's Medical Center; Memphis, Tennessee

Mary V. Reiling, Pharm.D.
Member, St. Jude's Research Hospital, Department of Pharmacy
Professor, College of Pharmacy
University of Tennessee Health Science Center; Memphis, Tennessee

Winfred C. Wang, M.D.
Member, St. Jude's Research Hospital, Department of Hematology
Professor of Pediatrics
University of Tennessee Health Science Center; Memphis, Tennessee

Valerie Samowitz, M.D.
Associate Professor
Division of General Pediatrics
Department of Pediatrics
University of Tennessee Health Science Center; Memphis, Tennessee

A Pediatric Challenge: Optimizing the Care of Children
Combined with the Etteldorf Symposium and the Memphis and Mid South Pediatric Society

Credit
Accreditation
Identify the initial approach to pediatric submersion injuries.
Describe the requirement of the American Board of Pediatrics’ new Maintenance of Certification Program.
Describe approaches which have been associated with minimizing the risk of errors and improving outcomes with
Describe the “medication use system,” as it relates to the child at home.
Identify at least three benefits to adapting evidence based practice.
Identify the most common oncologic emergencies presenting to primary care providers
Describe at least three components of the CDC’s strategy to manage and mitigate the H1N1 pandemic.
Describe the medical plan of care including prevention and management of complications for influenza.
Describe three gene variations affecting drug response that are ready for clinical use now.
Objectives
Credit(s). Physicians should only claim credit commensurate with the extent of their participation in the activity.
Association, an accredited approver by the American Nurses Credentialing Center's Commission on Accreditation.
Children's Research Hospital is accredited by the ACCME to provide continuing medical education for physicians.
Accreditation Council for Continuing Medical Education (ACCME) through joint sponsorship of Le Bonheur Children's
Attendees will understand how to self assess and improve
Describe the differences between warm and cold water submersion injuries.

Accreditation
This activity has been planned and implemented in accordance with the essential Areas and Policies of the Accreditation Council for Continuing Medical Education (ACCME) through joint sponsorship of Le Bonheur Children's Medical Center, St. Jude Children's Research Hospital, and The University of Tennessee Health Science Center. St. Jude Children's Research Hospital is accredited by the ACCME to provide continuing medical education for physicians.
Methodol Le Bonheur Healthcare is an accredited provider of continuing nursing education by the Tennessee Nurses Research Council, an accredited approval by the American Nurses Credentialing Center’s Commission on Accreditation.

Credit
St. Jude Children’s Research Hospital designates this educational activity for a maximum of 10.25 Category 1 Credits. Physicians should only claim credit commensurate with the extent of their participation in the activity.

Faculty Disclosure
St. Jude Children’s Research Hospital and UT/CH requires all instructors, planners, and other individuals in a position to control the content of this activity to disclose any real or apparent conflict of interest. Individuals who declare an interest must also disclose information regarding the sources of any financial compensation related to the content of the presentation. All identified conflicts of interest will be shared with those in attendance to ensure fair balance of information presented.

Course Alternates
Changes in the program faculty, topics, and schedule may be necessary. These may occur without notice when it does not permit notification.

Showing 5 to 6 of 14 items.
Apparent conflict of interest they may have as related to the content of this CME activity.

Other individuals in a position to control the content of this activity to disclose any real or apparent conflict of interest they may have as related to the content of this CME activity.

Describe two commonly used surgical treatment options for children with ruptured appendicitis.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify at least three benefits to adapting evidence based practice.

Describe initial management of children with leukemia or lymphoma.

Identify the most common oncologic emergencies presenting to primary care providers.

Identify the urgent initial evaluation of children with suspected leukemia or lymphoma.

Articulate at least three clinical manifestations of seasonal and pandemic influenza.

Describe ways that the ABP is focusing on quality improvement.

Identify the roles of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.

Identify the types of (reported) errors that are encountered with children at home.

Describe the “medication use system,” as it relates to the child at home.
