

JANUARY

## National Birth Defects Prevention Month

---

*And wherever he went, into villages or cities or farms, they laid the sick in the marketplaces, and begged him that they might touch even the fringe of his cloak; and all who touched it were healed.*

– Mark 6:56

---

### January is National Birth Defects Prevention Month.

About 1 in every 33 babies is born with some sort of diagnosable defect. Not all birth defects can be prevented, but there are steps to take to decrease the likelihood of health problems for babies and their mothers. Among those steps are increased access to prenatal care, screenings, and fetal interventions, all of which are crucial to the prevention and treatment of birth defects and other issues for the health of mothers and babies.

**At MLH:** Through a partnership with Le Bonheur Children's Hospital, the University of Tennessee Health Science Center and Regional One Health, the Fetal Center at Le Bonheur Children's Hospital is the only center of its kind in the area to offer a complete range of services from prenatal diagnosis to fetal intervention. Through this partnership, the Fetal Center treats babies diagnosed in utero with a congenital anomaly. For more information, please call **1-866-870-5570**.
